7th October 1966

Dear Joshua,

I see that you and I are down to speak for fifteen minutes at the ACP Symposium in San Francisco on April 12.

My own particular line on these occasions tends to be eugenics, but I feel you hold the copyright in genetical matters, and will willingly try to work up some other topic if it is your intention to speak about eugenics.

Now I come to think of it, wouldn't it be rather fun if you were to speak about surgery and transplantation, rather as you did at the Ciba Conference, and I were to speak on genetics? Anyhow, let me know what you think, and I shall of course be guided by it.

Yours ~~sincerely~~, *eva*,

I agree

Peter Medawar

Professor Joshua Lederberg,
Department of Genetics,
Stanford University School of Medicine,
Stanford Medical Center,
Palo Alto.

*no, I don't think I will
talk about eugenics, but
perhaps about developmental
biology.
Tell them.*

John
